

Valve Jacket Specification Form

Please fill out this form to specify your insulated valve jacket requirements. Once completed, save the file and email it to sales@pipelagging.com. All fields are optional unless marked with * (required).

Size and Type of Valve or Tap

Dimensions (e.g., diameter, length, height):

Type (e.g., gate valve, ball valve, butterfly valve, tap):

Connection Types (e.g., flanged, threaded):

Operating Conditions

Temperature Range of Fluid/Gas (*):

Ambient Temperature Range:

Pressure Range:

Purpose of Insulation

Purpose (e.g., thermal insulation, personnel protection, energy loss reduction):

Environmental Factors

Indoor or Outdoor Use:

Exposure (e.g., moisture, chemicals, UV light, weather):

Contaminants (e.g., dust, dirt):

Material Requirements

Special Properties (e.g., fire-resistant, waterproof, chemical-resistant):

Preferred Insulation Material (e.g., fibreglass, silicone, PTFE):

Removable/Reusable or Permanent:

Access Frequency

How often will the valve/tap be accessed?

Quick-Release Features Needed (e.g., Velcro, straps, clips):

Custom Cutouts (e.g., for actuators, stems, handles):

Industry Standards or Regulations

Certifications Required (e.g., OSHA, ISO, ATEX):

Specialized Standards (e.g., food-grade, pharmaceutical):

Budget and Lead Time

Cost Constraints:

Lead Time Needed (e.g., off-the-shelf, custom-made in 7-10 days):

Additional Features

Labelling, Colour-Coding, or Branding:

Heat Tracing or Sensors Needed:

Installation Constraints

Space Limitations Around Valve/Tap:

Nearby Components Affecting Design:
